

CENTROTECNICA
stress to ensure

the **Expander Redesign**

LIGHTER, CHEAPER, AND BETTER PERFORMER

Simply a **better way** to expand your test surface.

The Expander Redesign is an evolution in the way of producing expanders

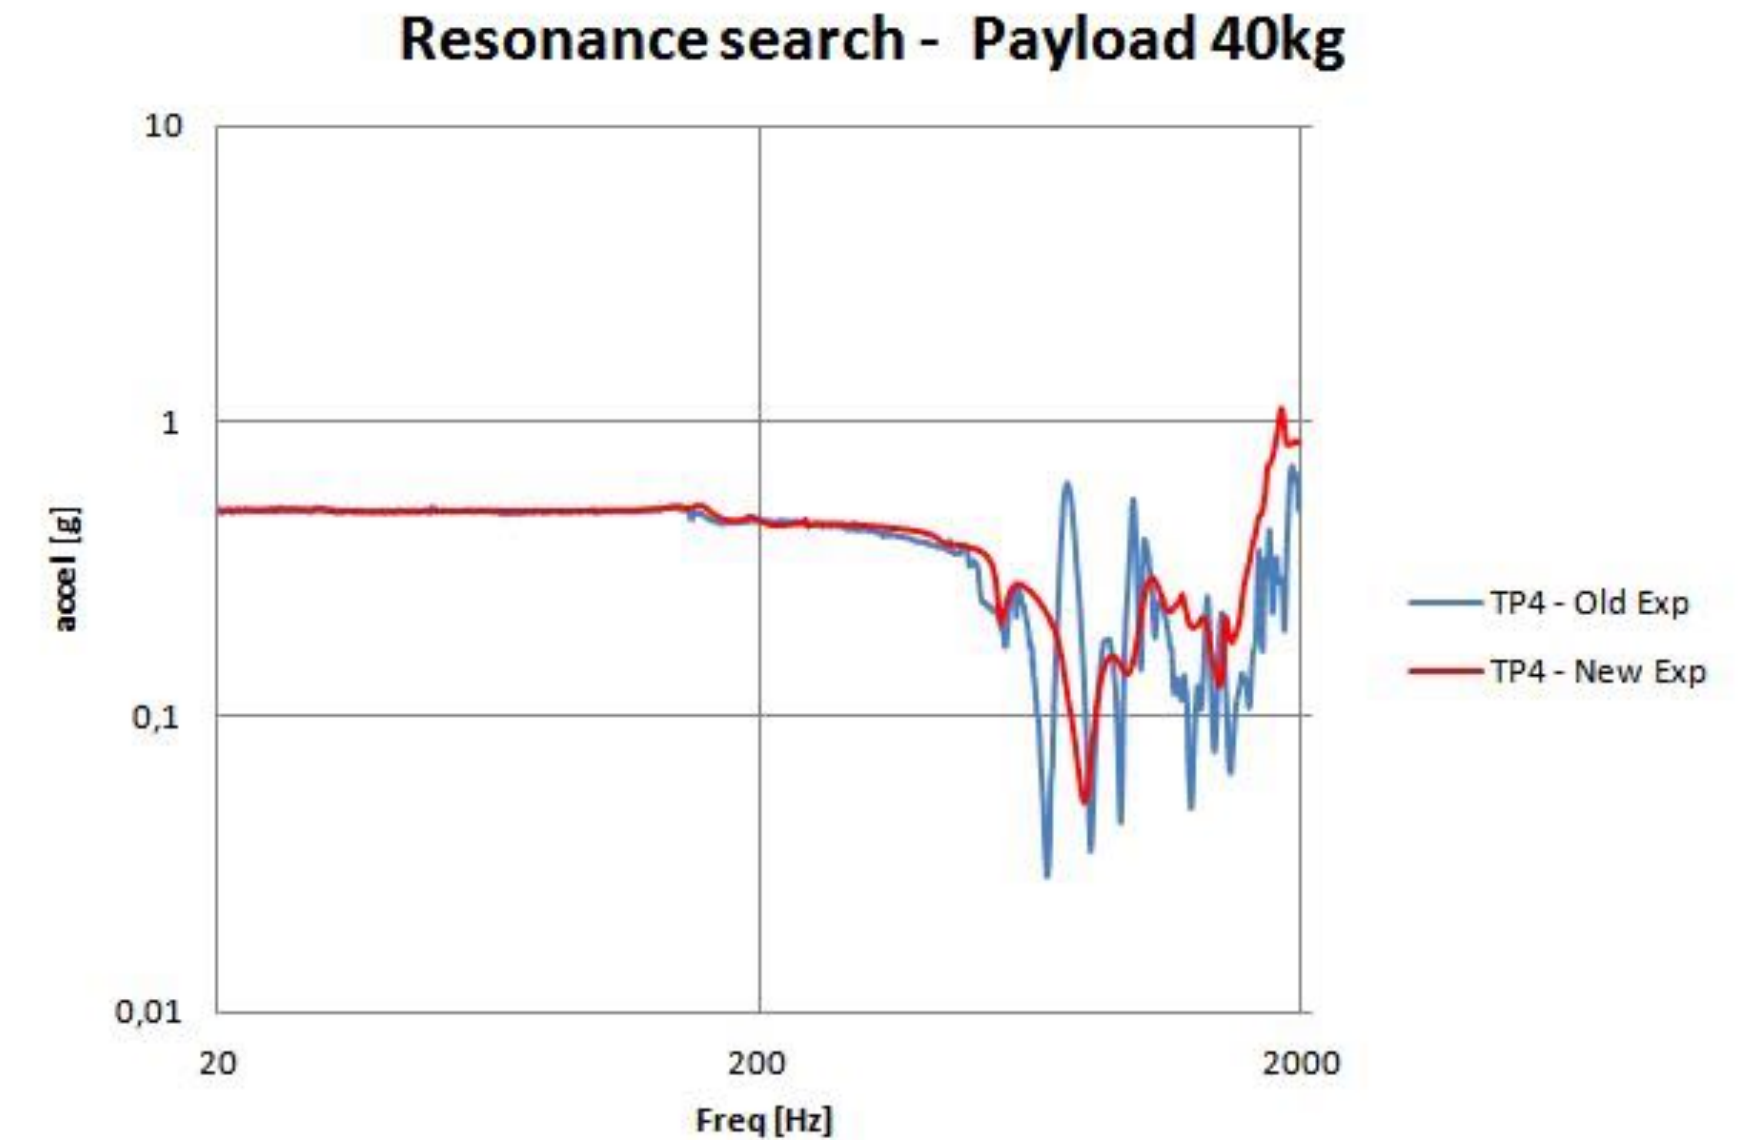

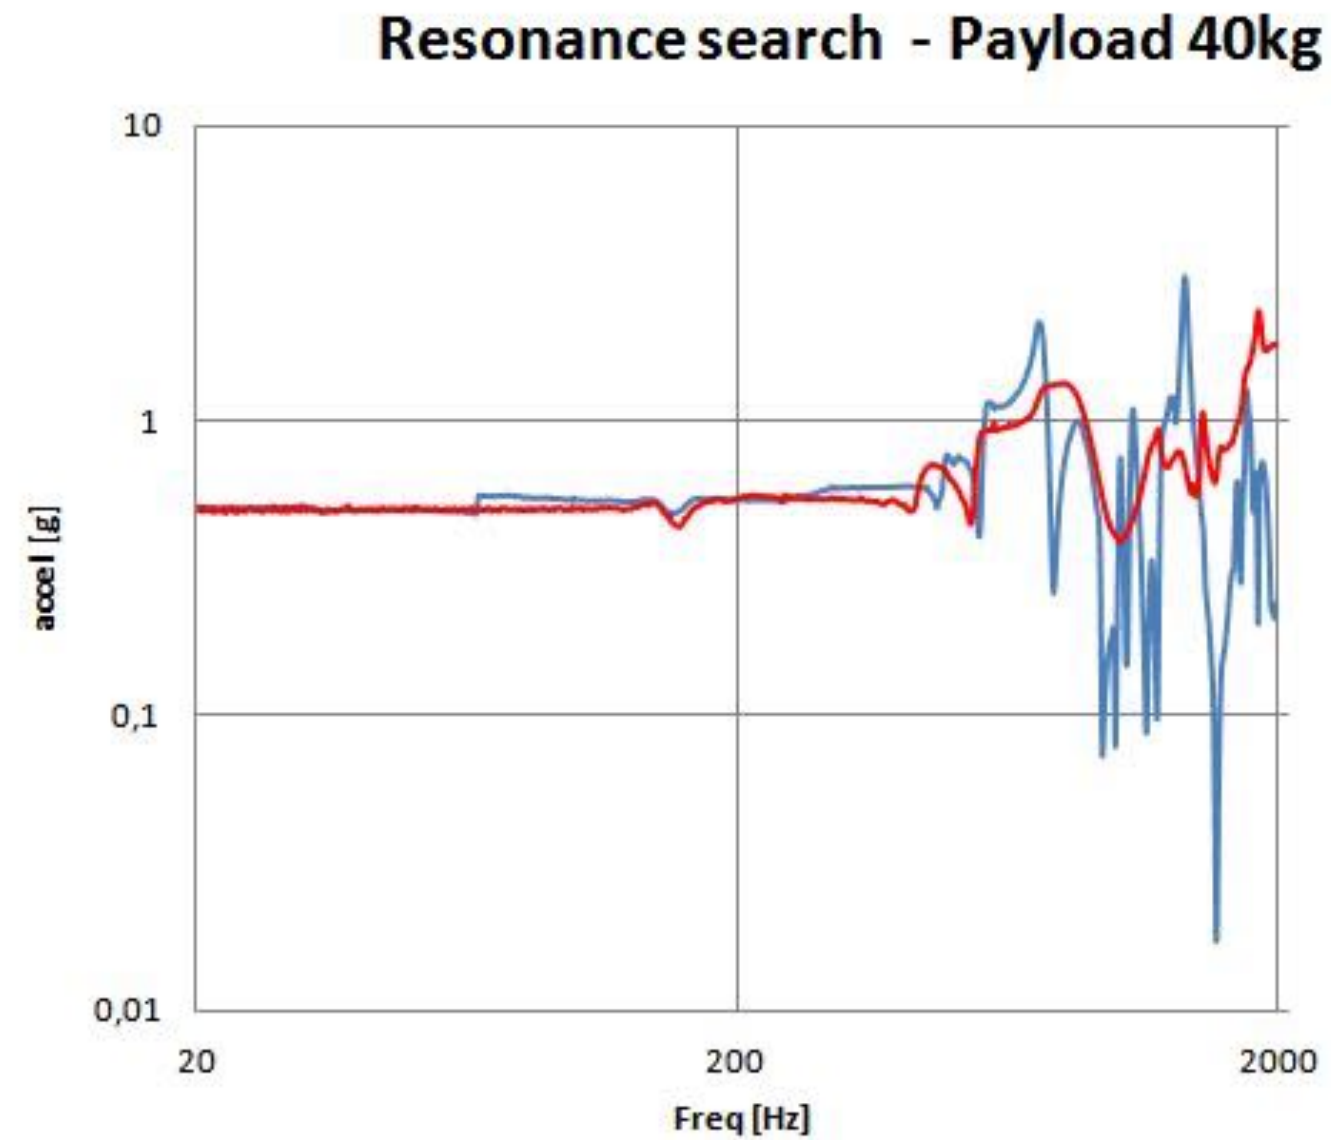

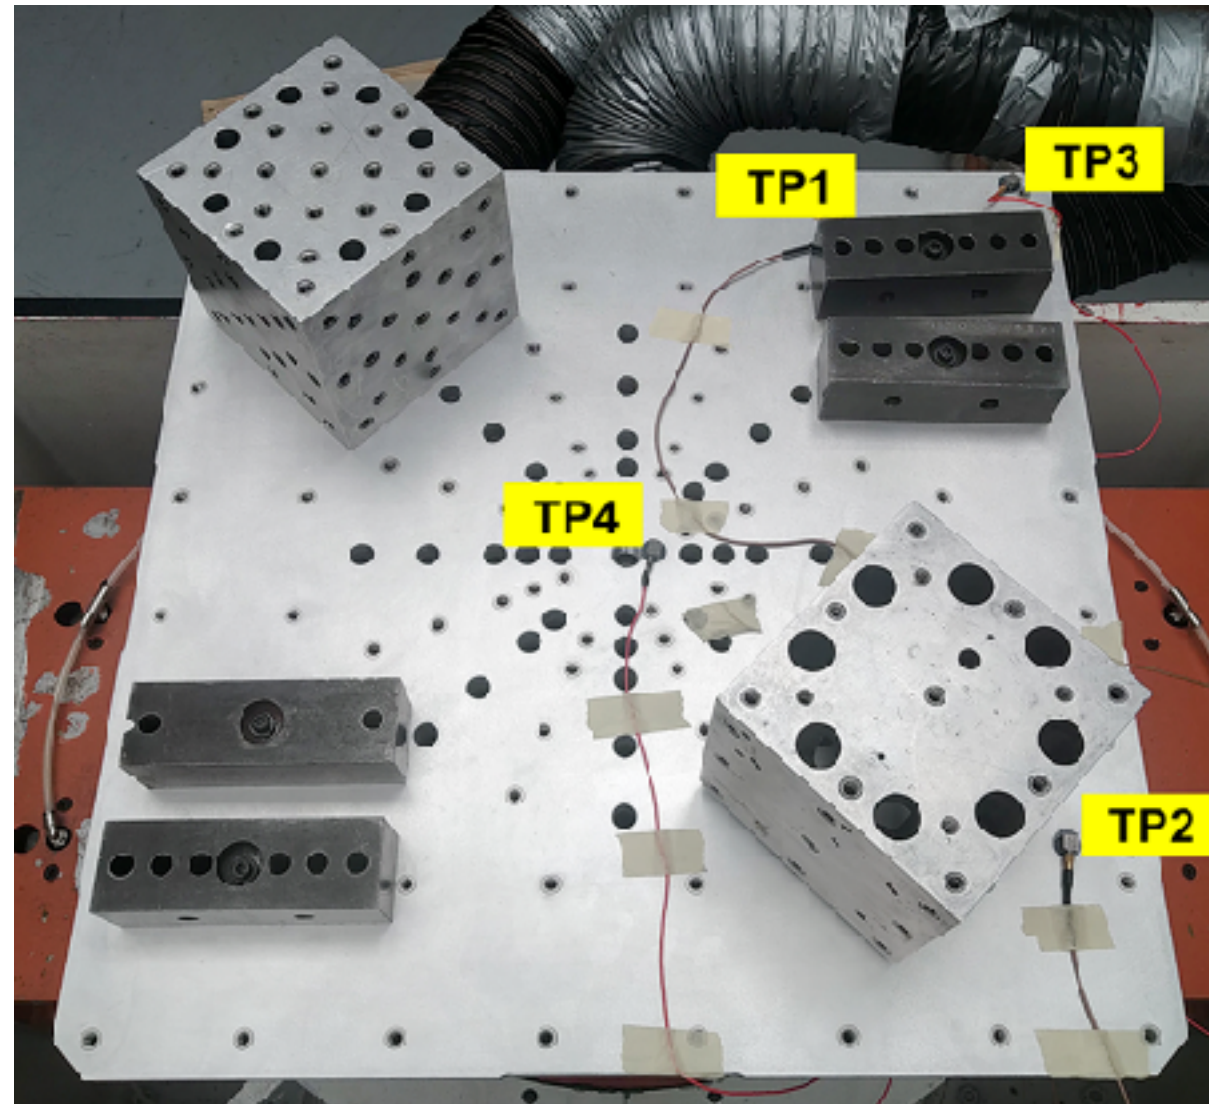

[Instant Clamp](#) ready: the solid top plate can be swapped with an Instant Clamp system without adding additional plates. It will make your test faster and cheaper.

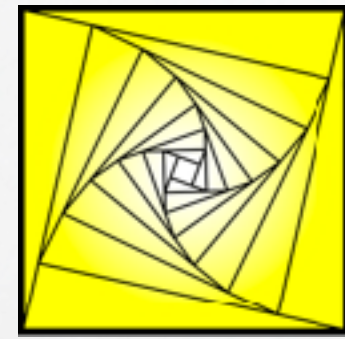

It's lighter and customizable in order to meet all customer needs (full aluminium, full magnesium or mixed configurations) making the whole vibrating system more efficient.

The new shape has been developed using a generative design software to improve the dynamic behavior.

The Expander Redesign has a more efficient dynamic behavior

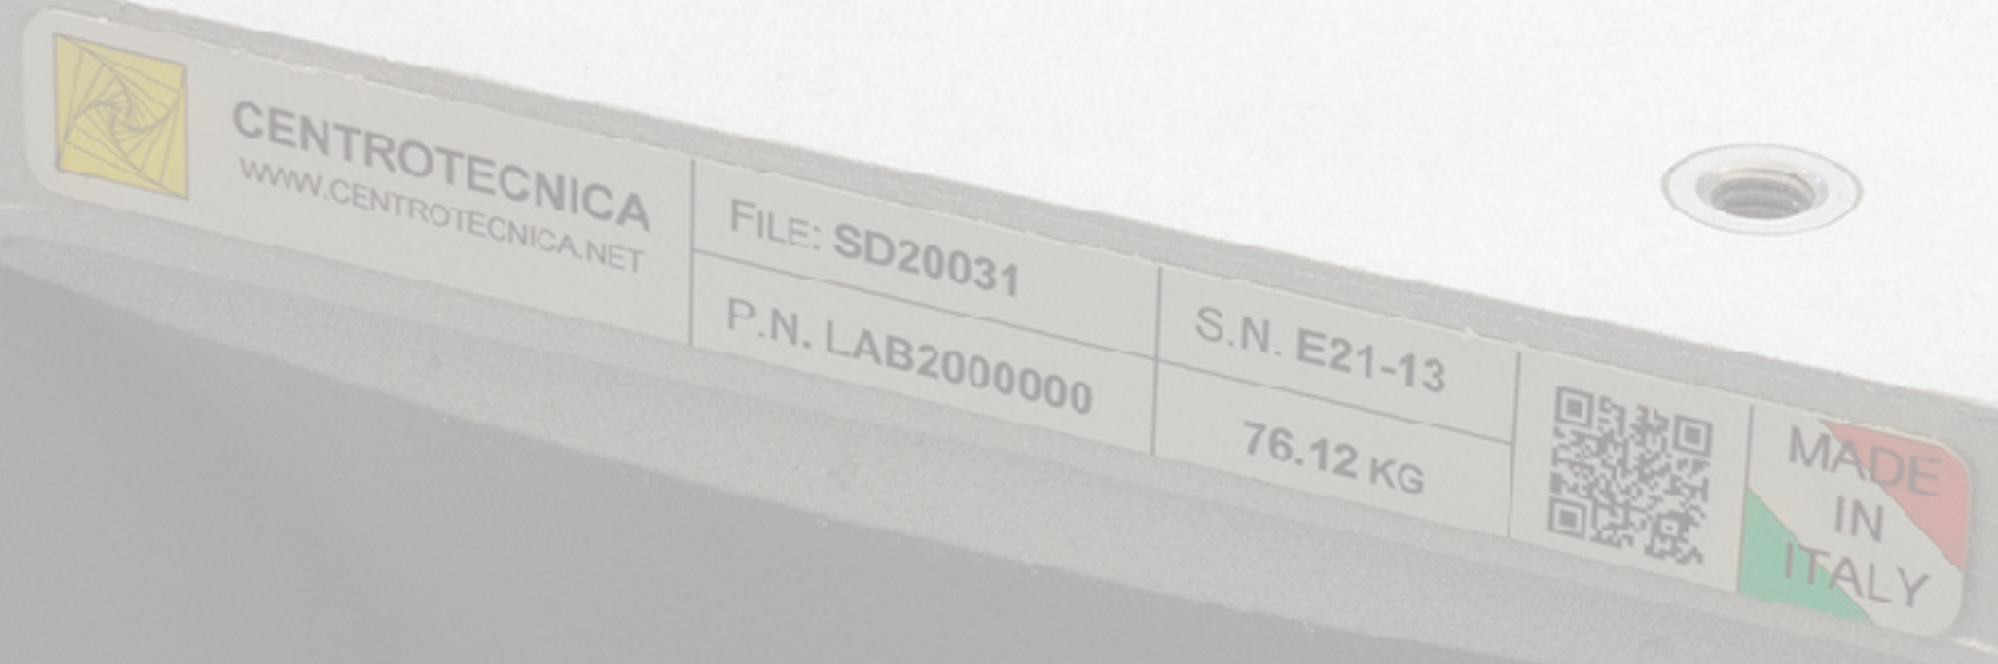

The **Expander Redesign** has been tested at Centrotecnica's testing house showing a better overall performance in loaded condition. Less resonance peaks in high frequency region means an easier control.

CENTROTECNICA
stress to ensure

*You can order the **Expander Redesign** in different shapes and sizes.
It will be listed at the **same price** as the standard models.*
